

Learn Aviation English online

In today's busy world, committing to fixed dates and times for a classic classroom-led language course is not always easy. Thanks to our Online Aviation English Course, you are given the opportunity to study at your own pace in your own time wherever it suits you best.

The Online Aviation English Course is designed for Pilots and Air Traffic Controllers with sufficient and relevant experience seeking to further improve their communicative skills in both plain and Aviation English. The course is also suitable for other employees in the aviation industry, who need to operate effectively in English.

During the course, candidates develop their listening, reading and speaking skills and expand their aviation vocabulary. The course consists of several units, such as:

- Operational Procedures and Air Law
- Meteorology

- Aeroplane Systems and Emergency Equipment
- Aerodynamics and Performance
- Aeroplane Structure
- Human Performance and Limitations
- Basic Radiotelephony

The Online Aviation English Course is available to participants who believe that they already have a strong background in Aviation English, but wish to improve their language skills even more. The course comprises 75 hours of computer-based training.

Pilots and Air Traffic Controllers have the option to combine this course with the online Radiotelephony course.
